

Michael Telakowicz

(567) 203-7239 | michael@mtelakowicz.com | mtelakowicz.com | [GitHub](https://github.com) | Akron, OH

Education

University of Akron – B.S. Computer Science

GPA: 3.8/4.0

Coursework: Software Engineering, Data Structures, DevOps, Internet Systems, Object Oriented Prog.

Front-End Developer Bootcamp | [Certificate](#)

Jul 2022 – Feb 2023

Frontend Simplified

Professional Experience

Software Engineer Intern

Jun 2023 – Sept 2023

Codehouse Solutions

Remote

- Developed responsive web applications from inception to deployment, meticulously translating Figma designs into functional prototypes using TypeScript and React, while ensuring adherence to modern development standards for robustness and scalability.
- Led backend development for Next.JS web apps using AWS Amplify, Lambda functions, and DynamoDB to offer a faster time-to-market, with serverless horizontal scaling.
- Implemented secure API endpoints with AWS AppSync, providing efficient data access while prioritizing data security and authentication.
- Utilized a Kanban board to manage project tasks and track progress, facilitating seamless project coordination and efficient Agile development.

Software Engineer Intern

Jul 2023 – Sept 2023

PRC-Salttillo

Remote

- Developed and maintained front-end components using Vue.js and enhanced user experience through responsive design with Tailwind CSS.
- Implemented new features and resolved bugs in a PHP-based backend system, contributing to overall system stability and performance.
- Managed and maintained an SQL database supporting over 1000 users, ensuring optimal performance, data integrity, and security measures.
- Effectively merged user stories into a pre-existing codebase, showcasing exceptional adaptability and problem-solving prowess within a dynamic and high-speed development ecosystem.

Front-End Developer Intern

Sept 2022 – Feb 2023

Frontend Simplified

Remote

- Transformed a static HTML, CSS, JavaScript, and React single-page application into an interactive user interface using animations, transitions, and carousels.
- Proficiently utilized Axios to handle API requests, enabling dynamic data presentation sourced from a cloud server, showcased through skeleton loading states, pagination, and dynamic routing.

Projects

Space Model | [Website](#) | [GitHub](#)

- Designed and developed a visually immersive 3D model of the solar system utilizing the three.js framework, enhancing user engagement and understanding of astronomical concepts.
- Integrated an external API to dynamically fetch and display detailed descriptions and information about each planet, ensuring up-to-date and informative content.

Video Game eCommerce Store | [Website](#) | [GitHub](#)

- Developed a React-based multi-page eCommerce website with an interactive user interface, search functionality, shopping cart, and user data-saving capabilities.

Technical Skills

Languages: HTML5 | CSS3 (+ SCSS, BEM) | JavaScript ES6+ | Typescript | Python | C++ | PHP | SQL

Frameworks: Tailwind.css | React (+ hooks) | Vue.js | Next.js | Three.js | Material-UI | Redux | Laravel

Technology: NPM | Git | Yarn | cmake | Docker | React dev tools | Firebase v9 | GitHub | GitLab | AWS
